The Social Problem-Solving Inventory Revised (SPSI-R) is a 25-item measure designed to assess social problem-solving ability. This ability has implications for all areas of life, including interpersonal and work-related contexts. The SPSI-R has been updated from the original manual published in 2002 to include a Revised Unisex Edition of the ACT Interest. Technical manual: Revised Unisex Edition of the ACT Interest. The factors represented by this scale include Artistic, Social, Enterprising, and Conventional, collectively referred to as RIASEC. The manual serves as an update to the original manual and includes a list of the inventory's items found in the Bar-On EQ-i™ Technical Manual. Impulse Control, Social Responsibility, and other related constructs are assessed through the SPSI-R.

The present study sought to examine how social problem solving and sexual assault are involved in suicidal risk in a sample of 221 female college students. We will employ the 25-item Social Problem-Solving Inventory Revised-Short Form (SPSI-R:S) in our analysis.
